

The following description and attached data is what you will need to get started on a project that has the following deliverables:

1. **A slide deck of your process and outcome**
  - a. This includes information about thoughts, data, process choices and results
  - b. The audience has technical and non-technical members so please provide information that covers both groups to keep everyone engaged/understanding
2. **Deliverable:**
  - a. Classify 606 cases into the appropriate issue\_area that are missing this value

The dataset contains 2698 complete cases from the Supreme Court of the United States from 1955 to 2021. Each of these cases has the case's identifiers as well as the facts of the case and the decision outcome.

Target Variable: First Party Winner, if true means that the first party won, and if false it means that the second party won.

**filevine\_case\_study\_justice - train set\_source data set.csv** : complete data set with 2698 examples of the data

**filevine\_case\_study\_justice - prediction set.csv** : data set that is missing the issue\_area field

During the case study process, you can meet with Brianna Connelly to discuss any thoughts, findings or ask any questions you may have.
